Guitar Wiz

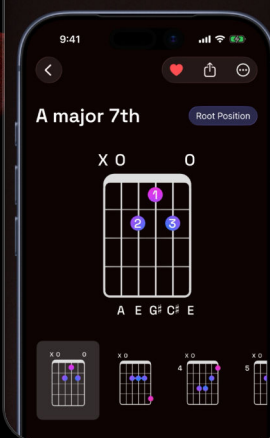

All-in-One Toolkit for Guitarists

<https://guitarwiz.app>

Everything starts with the **chord**

Explore every guitar chord and hear how it sounds

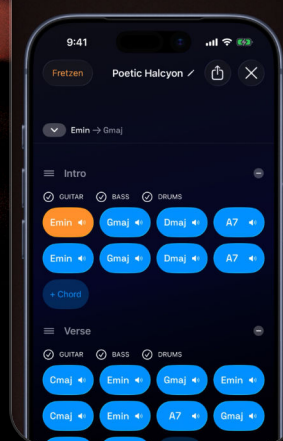

Stay in **tune**. Keep your **time**.

A precision guitar tuner and metronome for daily practice.

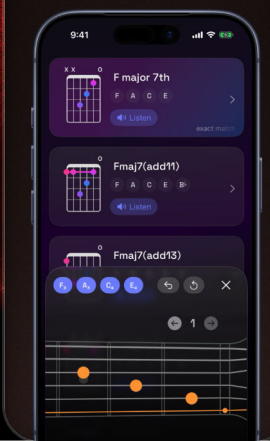

Turn **progressions** into **songs**

Build sections, choose backing patterns, and jam in key.

Find the **chord** you're hearing

Start with notes or a shape, then find the chord.

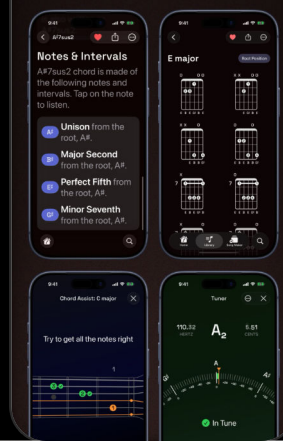

Your essentials, on **Apple Watch**

Tune, tap tempo, and check chords without reaching for your phone.

Built for **every** guitarist

Large text support, VoiceOver, strong contrast and clear cues beyond color.

About the app

Guitar Wiz is an **all-in-one toolkit** for **guitarists** - combining a **chord library, tuner, metronome, songwriting tools, and real-time feedback** into one seamless experience.

Guitar Wiz focuses on helping you **understand how chords connect, sound, and function in real music**, not just memorize shapes.

Built with modern iOS technologies and **crafted by a working musician**, Guitar Wiz delivers a fast, intuitive, and practical experience for players at every level.

What Makes It Different

Interactive chord diagrams (not just static diagrams)

Contextual learning instead of memorization

All-in-one: tuner + metronome + chords + songwriting

Accessibility-first design (VoiceOver supported)

Accessibility Focus

Scan the QR code to see the demo of some accessibility features - reading chord diagrams using VoiceOver and tuning the guitar using VoiceOver.

About the Developer

Guitar Wiz is built by a solo indie developer, **Bijoy Thangaraj**.

With a background in both **technology and music**, Bijoy has been crafting innovative iOS applications **since 2011**, blending his technical expertise with his passion for music. This app stands out for its depth and usability, reflecting Bijoy's commitment to quality and his deep understanding of musicians' needs.

Beyond app development, Bijoy is an **accomplished musician and producer**. He plays **piano and guitar** professionally and has been involved in various musical projects with bands, in studio sessions, for movies and more. His musical endeavors further enrich his app development, ensuring that his products resonate with the practical needs of fellow musicians.
